13	2026-07-08	Böhm	Klem		Jaroslav Freymann	Patrick Meusling	
14	2026-07-15	Klem	Böhm		Simeon Zobel	Patrick Meusling	Demo day!
15	2026-07-22	Böhm	Klem		Simeon Zobel	Patrick Meusling	Retrospective
Product owners, software developers, and Scrum Master are set and ideally don't change over time; the critical part is the Release Manager role you need to define here							

Goals	Aquire new skills
	Produce a functioning and valuable product
Meeting norms	We show up on time
	Devs make sure to try to understand the new sprints tickets before the team meeting
	POs provide a summary of industry partner meeting
Working norms	Clean, testable code with clear commit messages, code comments
	We respect other people's work
Coordination norms	Separate branches for issues, branches only get merged via Merge Requests, second person to review
	We balance workload among the team
Communication norms	We regularly check the corresponding channels
	We make sure to communicate possible problems as early as possible (absence, etc.)
	We communicate constructively
Consideration norms	We discuss issues openly
	We vote in case we can't reach a consensus
Cont. improvement norms	We encourage critique and improvement efforts
	We reach out for help early enough to still finish our tasks
Rewards	Favorite Drink
	Wear a cool hat or glasses during meetings
Sanctions	Publish a stackoverflow answer
Signatures	
Scrum Master	Patrick Meusling
Product owner	Luca Klem
Product owner	Luca Böhm
Software developer	Katharina Auer
Software developer	Jaroslav Freymann
Software developer	Julian Schütz
Software developer	Patrick Durand
Software developer	Moritz Reinel
Software developer	Simeon Zobel
Software developer	Jeremias Friedrich

	PLEASE CREATE THE VELOCITY CHART ON A NEW TAB USING THE DATA FROM THIS TAB

A bar chart titled "Velocity Chart" is displayed in the center of the page. The y-axis is labeled "Points" and ranges from 10 to 20. The x-axis has four categories. The bars are blue. The values for the four categories are approximately 12, 19, 15, and 15.

Category	Points
Category 1	12
Category 2	19
Category 3	15
Category 4	15

Sprint	Goal	Feature Name	Est. size	Est. remaining	Real size	Real remaining

#	Feature Definition of Done	Sprint Release Definition of Done	Project Release Definition of Done
	All Acceptance criterias defined in the backlog item are met and verified		
	Work done is pushed to the Github repository		
	For each backlog item a branch is created		
	Pull requests are created for each branch		
	Pull requests are reviewed		
	Corresponding branches are merged		
	Software Bill of Materials in the planning document is updated if new dependencies were added		
	The Wiki Section/Documentation corresponding to the work done is updated		
	Unit tests are written for all new logic		
	All unit tests must pass successfully in the CI pipeline		
	Code passes cargo fmt (style) and cargo clippy (linting)		
	All Developers assigned to a backlog item must communicate and coordinate with each other to complete the task		
		All features merged into the main branch; the CI pipeline is "Green"	
		Release candidates with a working and meaningful update to the previous sprint is tagged	
		Previously established features must continue to work.	
			All automated tests and validation checks for the developed components pass without errors
			A single-click deployment/flashable image for the selected hardware is available
			User documentation (usage examples, configuration steps, expected outputs) is finalized and up to date
			All open-source licenses are documented and compliant
			A "Handover Document" for Weber is completed in the Wiki
			The final release has been reviewed and approved by all project team members and the industry partner

					8	Very large size	
					13	Too large (size)	
How to play planning poker							
1. Everyone type their number into their value field, don't hit return yet							
2. Someone, perhaps a product owner, count down 3.. 2.. 1..							
3. Then, everyone hit return to submit their value
