

{user|design|build}-documentation

For the best view, it is recommended to execute `make docs-serve` in a cloned repository. Alternatively, please take a look at the `SUMMARY.md` in the Documentation folder. Or, you can take a look at the links below:

<https://github.com/amosproj/amos2026ss01-zero-downtime-linux-updates/wiki/Documentation>

<https://github.com/amosproj/amos2026ss01-zero-downtime-linux-updates/wiki/Documentation:-Architecture>

<https://github.com/amosproj/amos2026ss01-zero-downtime-linux-updates/wiki/Documentation:-Build-Documentation>

<https://github.com/amosproj/amos2026ss01-zero-downtime-linux-updates/wiki/Documentation:-User-Documentation>

Github Wiki Pages only offers a poor support for the documentation style chosen for our repository, as it is separate from the actual code structure. So the links only offer a shallow view of the documentation.
